

FL-800 & SU-101 FILLING/INSERTING/CAPPING MONOBLOC MACHINE & UNSCRAMBLER

Specification

- Filling Capacity Options: 5-50 ml
- Filling Nozzles: 2 or 4
- Filling Accuracy: $\pm 1\%$
- Filling Pump Option: Peristaltic / Piston
- Production Speed: 50 BPM maximum
- Supply Voltage: 220V 60HZ Single Phase
- Power Consumption: 2.2 KW
- Air Pressure: 4-6 kg
- Dimension:
 - FL-800
(L)3100mm x (W)2000mm x (H)1900mm
 - FL-800&SU-101
(L)4175mm x (W)2000mm x (H)1900mm
- Net Weight: Approx. 1500 KG

FL-800 & SU-101

FILLING/INSERTING/CAPPING MONOBLOC MACHINE & UNSCRAMBLER

The Pack Leader FL-800 filling/inserting/capping monobloc machine with unscrambler is suitable for liquids from low to medium viscosity, with accurate peristaltic and piston pumps filling performance. This machine is designed with double pumps/nozzles to boost production speed.

Advantage of its double pumps/nozzles enable machine to achieve cost effective production and high performance. User-friendly design allows operators to have an easy time to operate and low maintenance. Flexible design allows customers to choose between 2 or 4 pumps/nozzles to be applied on the machine.

Nib and Caps feed by vibrating bowls, and capping mechanism uses Permanent Magnet Hysteresis Clutch and Brake which can easily control the torque of capping.

Accurate bottle placing by servo controlled star wheel to ensure the filling/inserting/capping in perfect positioning.

Suitable for E-cigarette liquids, penicillin products, and eye drop products.

Simple to Use

The FL-800 and SU-101 highly efficient design enables easy operation and quick change-over for different product specifications and requirements.

Built to Last

In strict compliance with Good Manufacturing Practices (GMP) standards and CE standards, the FL-800's solid and steady frame is made from durable 304 stainless steel and anodized aluminum. Contact parts are made from 316 stainless steel. This durability translates into an easy-to-maintain machine with a long and durable life.

Exceptional Support

With all of Pack Leader's high-quality products, customers from around the world receive support exactly when they need it – benefiting from 24x7 customer service from company's experts, U.S. & U.K.-based support team.

Precision concentrated heavy-walled SS316 piston or peristaltic pump for accurated filling performance

Easy and quick adjustment for Nib and Cap mechanism for absolute reliable accuracy

Flexible

- The FL-800 3 IN 1 Monobloc Machine offers exceptional flexibility, and adapts to small size of products, including E-liquids products, eye drop products, and penicillin products.
- The sturdy conveyor has adjustable conveyor guide rails and replaceable starwheel based on different sizes of products to accommodate the varying product sizes.

Efficient

- The FL-800 design allows for low energy consumption to protect and environment and save energy while still producing a generous output to keep up with production needs.
- The integrated touch-screen controls bring ease of use to the operator, while increasing efficiency and productivity for each project.
- With the Volume Set feature, all pistons can be controlled by the Servo System, and the volume for each piston can be changed with one touch on the touch-screen controls. This eliminates the need to adjust the pistons manually.

Practical

- The FL-800 features a management setting with password protection, which allows management to have more capabilities, while restricting access to those directly involved with the project at hand.
- The machine is fully enclosed and well-suited for simple and quick changeovers, with built-in mobility castors that enable easy movement from one production area to the next.
